M The Medicare symbol indicates that this product, or group of products, may be reimbursable under Medicare Part B. Please contact the SADMERC at 877.735.1326 to obtain the specific HCPCS codes and modifiers necessary for billing, as this information changes frequently. Further information regarding Medicare Part B Reimbursement can be found by visiting the Centers for Medicare and Medicaid Services website at www.cms.hhs.gov

CS This symbol indicates that this product is available through the Cardinal Health Drop Ship Program. Please contact a Cardinal Health Home Healthcare specialist at 800.530.2696 for more information or to place a drop ship order.

This catalog contains only a portion of the Home Healthcare products available through Cardinal Health. Please check with the servicing distribution center for availability of additional products. Products may not be stocked in all distribution centers.

Home Healthcare Specialists

Cardinal Health provides Home Healthcare Specialists as a multi-functional resource for you and your staff. Home Healthcare Specialists can provide extensive product knowledge and are the go-to experts for all your home healthcare questions.

What your Home Healthcare Specialist can do for you

- Offer guidance to help you and your staff provide the best service to your patients
- Respond to your questions about home healthcare product availability and orders
- Research available alternatives to home healthcare products for your patients
- Supply information and place orders for diabetic shoe programs, Rehab Plus+ Program and Drop Ship program
- Provide outstanding service and personalized attention to your pharmacy

Home Healthcare Specialists will answer your questions regarding:

- Aids to Daily Living
- Baby
- Bariatric
- Bath Safety
- Bed Accessories
- Braces and Supports
- Cushioning
- Diabetes Care
- Diagnostics
- Exercise/Physical Therapy
- Foot Care
- Gloves and Masks

"I can—and do—count on my Cardinal Home Health team. It is with extreme confidence that I call "my team" knowing that when they answer the phone, my patients' needs will be taken care of professionally and in a timely fashion—not to mention how great they make me and my company look!"

Penny Moore, Medicare Billing Specialist,
Red Cross Drug Store, La Grande, OR

"From past experience I have found the DME Customer Service team out of Dublin to be amazingly fast and thorough with front end Q&A. When I ran a pharmacy front end, they were on speed dial and were a life saver many times."

Jason Simmons, Lead Merchandising Coordinator,
Cardinal Health

Specialized Care Center — Home Healthcare

Independent pharmacies face ever greater challenges as they attempt to serve their customers, grow their customer base, and remain profitable. Prescription margins are eroding, CMS (Centers for Medicare and Medicaid Services) rules and regulations are becoming more difficult, billing is getting more trying, more insurers are adopting the Star Rating system, and Accountable Care Organizations for Medicare and Medicaid are becoming more prevalent. Cardinal Health understands these challenges.

Diversifying and creating alternative revenue streams are imperative for continued success in this ever-changing environment.

To meet this need, Cardinal Health created Specialized Care Center (SCC) to help independent pharmacies deliver a level of customer service and that personal touch to make them a destination for immunization, diabetes care, long term care, heart health, and home healthcare. SCCs provide tools and educational resources that pharmacies need to provide their customers with the care and attention they expect.

Why enter the home healthcare market?

Americans are now **eligible for Medicare** with 10,000 more becoming eligible each day

fill twice as many prescriptions as those younger than 65 and account for **30 percent of all prescription use** and creating a substantial amount of pharmacy foot traffic

With the **increasing mobility and independent living challenges** that come with age, these customers are typically in need of a wide range of **durable medical equipment (DME)** to support their everyday living

Pharmacists are seen as trusted healthcare professionals in their communities, so pharmacies that offer home healthcare products and support to an aging population can capture and retain patients who are looking for a complete range of solutions.

The Specialized Care Center — Home Healthcare provides the **education and training, marketing support, billing, accreditation, and CMS regulation assistance** to help pharmacies establish themselves as home healthcare specialists.

Become your community's diabetes resource destination

We understand the challenges facing retail independent pharmacies today and that it's more important than ever to diversify your business and create alternate revenue streams. That's exactly why we are continuously expanding our Specialized Care Centers, designed to help you develop niche offerings that require the personal touch only a community pharmacy can offer.

These special offerings include:

- Immunizations
- Home healthcare
- Diabetes
- Long-term care
- Heart health

The Specialized Care Center — Diabetes provides a unique combination of training, education, support and product recommendations for pharmacies to become the community's diabetes resource destination. By incorporating the program, you will reinforce your reputation as a trusted diabetes advisor for your customers, offering personalized services, counsel and care.

Facts about the diabetic customer¹:

People with **diabetes and pre-diabetes** represent

of the **adult drug store shopper**

On average they **spend**

annually at the **pharmacy**

Their shopping basket **costs**

that of a shopper **without diabetes**

Why now is the time to get into the diabetes space?

With **25.8 million diagnosed cases of diabetes** in children and adults in the United States, the disease is a national healthcare issue.

- Diabetes affects **8.3 percent of the U.S. population** and is the seventh leading cause of death
- **1.9 million people aged 20 years or older** were newly diagnosed with diabetes in 2010
- The diabetes population is expected to **double by 2034**
